Experience

Brand Success Engineer Intern @ Resonance

Summer 2021 // New York City, NY

- › Integrated new client brands' Shopify websites with create.ONE software
- › Developed Looker dashboard to visualize customer service data for partner brands
- › Acted as liaison between brand success and tech teams by managing communication channels and defining implementations of software improvements at weekly meetings

Non-Profit Program Development Intern @ Antenna

Summer 2019 // New Orleans, LA

- › Maintained and updated daily content on WordPress website
- › Wrangled, transformed, and built database of historical data for Slave Rebellion Reenactment project
- › Assisted facilitation of 17 artist interviews and allocation of \$60,000 worth of artist project grants through the Platforms Fund

Campus Leadership

Founder & President @ TU Fashion

Fall 2019 - Spring 2022 // New Orleans, LA

- › Founded Tulane's first fashion club after recognizing student interest in fashion careers and lack of a fashion program
- › Oversaw executive board of 12 officers through weekly officer meetings, individual check-ins, and task delegation
- › Facilitated biweekly workshops and events that inform members on topics such as fashion sustainability, diversity, styling, and sewing

Entrepreneurship Officer, Brother @ Alpha Kappa Psi Business Fraternity

Fall 2019 - Spring 2022 // New Orleans, LA

- › Connected Tulane's Lepage Center for Entrepreneurship with student entrepreneurs in Pi Chi chapter to provide them with mentorship and funding resources
- › Organized monthly workshops on entrepreneurial topics such as creating a business plan, perfecting a pitch, and starting a business step-by-step

Projects

Video Virtual Try-On | Capstone Project

Fall 2021 - Spring 2022 // New Orleans, LA

- › Built a virtual try-on solution in Python that takes in a user's video input, runs the ACGPN model on extracted video frames, and outputs a virtual try-on video that mimics a real-time virtual clothing try-on

Impact of Religion on the Global Gender Gap Index | Data Tutorial

Fall 2021 // New Orleans, LA

- › Implemented data analysis using Pandas by identifying and scraping data from the GGGI and each country's major religion for the years 2010-2021, performing an exploratory analysis, and investigating how a country's major religion(s) impact the size of its gender gap in terms of health, education, economics, and politics

Voting Machine | Interactive Project

Spring 2020 // New Orleans, LA

- › Built voting machine in Java which allows the user to input a ballot file, vote on a ballot, and view outputted election results via executable JAR
